**RE: APPLICATION FOR DEVELOPER/PROGRAMMER ROLE**

Dear Employer

Considering the heading above, Are you searching for a Software Developer with a proven ability to develop high-performance applications and technical innovations? If so, please consider my enclosed resume

Since 2018 to present, I have served as a full stack software engineer for a Startup , where I have been repeatedly recognized for developing innovative solutions for business, I am responsible for full life-cycle development of next-generation software, from initial requirement gathering to design, coding, testing, documentation and implementation.

Known for excellent client-facing skills, I have participated in proposals and presentations that have landed six-figure contracts. I also excel in merging business and user needs into high-quality, cost-effective design solutions while keeping within budgetary constraints.

In terms of education I have a bachelors degree in information technology from National Institute Of Transport where I have been trained well enough to do the job for the role in question.

My technical expertise includes cross-platform proficiency (Windows and Linux) fluency in several programming languages (including Python, JavaScript, Dart, HTML CSS), Also I work in web and mobile development areas of software development, I use Python with Django framework as well as Dart with flutter framework for cross platform mobile applicants.

Thank you for this opportunity to present my area of expertise though this letter , I look forward for your response

Sincerely,

Isaya Bendera
